

IESP conducts DDC Training Program for staff of Force Motors Ltd., Pune

Our team led by Airawat Group's MD, Mr. A.S. Khanna, facilitated a Defensive Driving (DDC) Training Program at Force Motors Ltd., Pune. Defensive Driving is driving to prevent accidents in spite of incorrect action of others and adverse conditions. DDC Training is being explored by many organizations, especially automobile companies, to inculcate safe driving habits amongst their employees across categories and spread knowledge on defensive driving.

Our DDC program is in accordance with the National Safety Council USA - Driver Improvement Program. It is customized as per the organization & type of vehicles driven.

The Course highlights the following Topics with the help of Audio Video Presentation & Videos - Who is to blame, The Car Ahead / The Car Behind, The Head On, The Intersection, Passing & Being Passed, Drinking & Driving, Road Safety Campaign and Road Traffic Accidents. With the interaction there is a behavior change in any person, sitting behind the wheel, who thinks about making a perfect Trip.

The training was very well received by the staff of Force Motors Ltd. with plans of next training batch underway. Our training received encouraging feedback from all participants like, " This training is very beneficial as I work in vehicle testing section. The videos helped us to understand & prevent the accidents and the causes of them." and " The course made me 'more' aware about vehicle & road safety. From today onwards, I shall be more alert & responsible than before while driving."
